

ARCANAUM

CRYSTAL COLLECTION

Ten disentanglement puzzles designed in Lithuania, cut from stone as
design objects for the home.

Wholesale collection 2026.

A DESIGN OBJECT THAT IS ALSO A PUZZLE

FOR THE ROOM

Solved or not, each piece is a small sculpture in polished stone. It sits on a shelf, a coffee table or a reception desk and asks every visitor to pick it up.

FOR ADULTS AND COLLECTORS

Each piece is a disentanglement puzzle: free the cord or the ring without cutting or untying anything. It asks for patience and spatial thinking, not prior knowledge. Difficulty runs from 2 to 9 on our scale of 10, so a shop can stock a first puzzle and a last one. For adults and collectors aged 14 and over.

8 DEEP STONES

We only use fine-grained or fibrous stones. Their tiny grains lock together and stop a crack from running, so a diamond tool follows our CAD file cleanly and the finished piece resists chipping; a single crystal such as clear quartz would flake. We round every edge and corner, so the stone does not chip where the cord pulls across it. Any piece can be cut in any of the 8 stones.

PINK CHALCEDONY

Dusty-rose pink. Grains too small to see, 6.5 to 7.

PETRIFIED WOOD

Walnut brown, a fossil tree turned to quartz, grain still showing, about 7.

SUGILITE

Deep royal violet. Dense and fine-grained, about 6.

RED JASPER

Oxblood red, dense and opaque, 6.5 to 7.

TIGER'S EYE

Chocolate gold that shifts in the light, about 7.

BLACK ONYX

Deep even black with a high polish, 6.5 to 7.

NEPHRITE JADE

Spinach green. Interlocked fibres make it the toughest of the eight.

DUMORTIERITE

Deep denim blue. Dense and fibrous, about 7.

HOW A PIECE IS DESIGNED AND CUT

01

DRAWN IN CAD

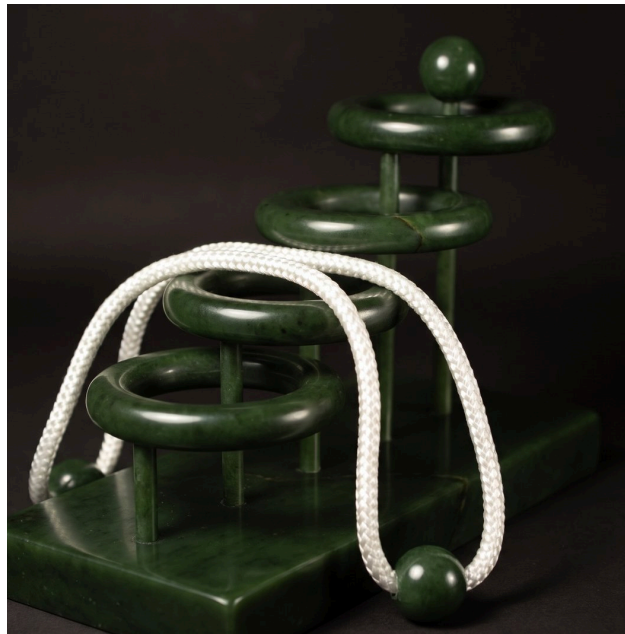

Every puzzle exists as a CAD file. The proportions that make the solution work carry over exactly to stone.

02

MACHINE-CUT FROM ONE STONE

A diamond-tool mill cuts each part from a single block of stone, straight from the CAD file.

03

POLISHED

Every surface is polished and every edge rounded.

04

CORDED

The cord and the steel are the same as on the wooden piece of the same name, so the solution is the same.

THE COLLECTION

The rings on each card show its difficulty from 1 to 10, so the buyer picks the right one. These five run from 2 to 5: good first puzzles.
